

LOS ANGELES POLICE DEPARTMENT CHOOSES JUSTICETRAX TO STRENGTHEN CRIME LAB EVIDENCE TRACKING AND REPORTING

JusticeTrax LIMS-plus® Laboratory Management Software Enables LAPD Scientific Investigation Division to Track and Manage Lab Workloads

MESA, AZ., July 3rd, 2007 – JusticeTrax Inc., a leading provider of software solutions for the criminal justice professional, announced today that the Los Angeles Police Department’s Scientific Investigation Division (SID), has selected JusticeTrax LIMS-plus® to help consolidate the case management of its crime labs. LAPD’s SID chose JusticeTrax because of its comprehensive case management tools and ease of integration with their pre-existing system and procedures.

The LAPD SID is comprised of two laboratories, the Criminalistics Laboratory and the Technical Laboratory. Together these labs are responsible for the collection, comparison and interpretation of physical evidence found at crimes scenes or collected from victims and suspects. The LAPD SID currently manages the flow of evidence through internally-developed databases. This legacy system does not automate tracking or reporting, nor can it be integrated amongst the two laboratories.

“As one of the largest crime labs in the country, the LAPD Scientific Investigation Division is always looking for ways to improve the efficiency of its examination process and to strengthen the chain of custody,” said Yvette Sanchez-Owens, Commanding Officer of the LAPD Scientific Investigation Division. “Our old database system has met our minimum requirements in past years, but it cannot keep up with the ever-growing caseloads that our analysts manage. After a thorough review of the many LIMS providers on the market today, we found JusticeTrax LIMS-plus® to be an ideal solution for us. Not only does it allow data sharing among our labs, but it also provides better tracking and reporting.”

Created by forensic scientists, JusticeTrax LIMS-plus® is a comprehensive case management system designed specifically for the forensic laboratory. The software system integrates evidence tracking, analytical results and lab management information to provide a clear view of the examination process. LIMS-plus® software is easy-to-use and provides an intuitive interface that enables crime labs, like the LAPD SID, to better manage their caseloads, reduce backlogs and improve service.

“Case management has become increasingly critical as forensic labs are forced to do more with less,” said Simon Key, co-founder and CEO of JusticeTrax. “As forensic crime labs like the LAPD SID attempt to streamline their case management, preserving the record of the chain of custody becomes progressively more important. JusticeTrax LIMS-plus® software integrates evidence tracking, analytical results and lab management information to assist crime labs in monitoring the total performance of their laboratory processes.”

“After an extensive review process, the LAPD Scientific Investigation Division chose JusticeTrax’s technology to preserve the record of the chain of custody and improve communications”, added Sanchez-Owens. “With the software’s unique iResults internet interface, detectives will no longer have to wait for a report to be mailed or faxed. Instead, detectives will be able to check our private intranet for signed final reports. With JusticeTrax LIMS-plus, we can strengthen the chain of custody while enabling a faster turnaround process.”

About LAPD Scientific Investigation Division (SID)

Founded in 1923, the LAPD’s Scientific Investigation Division (SID) is an ASCLD accredited forensic laboratory responsible for gathering, preserving and evaluating evidence seized pursuant to criminal investigations. The Scientific Investigation Division is comprised of two labs, a criminalistics laboratory and a technical laboratory. Together these labs provide a full range of forensic services including expert testimony, polygraph exams, evidence collection and analysis, as well as video and audio surveillance.

About JusticeTrax

JusticeTrax Inc. is a leading provider of software solutions for the criminal justice professional. LIMS-plus®, the company’s flagship product, is the premier laboratory information management system designed for forensic laboratories of all sizes. JusticeTrax is a privately-held, employee-owned company. JusticeTrax products are used in some of the most sophisticated crime laboratories in the world, making it a leader in forensic evidence management.
